

HARDY-RAMANUJAN JOURNAL

Special Commemorative volume
in honour of S. Srinivasan

VOLUME 41

December 2018

EDITORIAL BOARD

Honorary Editor:	R. Balasubramanian
Editors:	Ritabrata Munshi
	V. Kumar Murty
	M. Ram Murty
	Kannan Soundararajan
	Michel Waldschmidt
Managing Editor:	C. S. Aravinda
Guest Editor for this volume:	K. Srinivas

CONTENTS

S. Srinivasan: A biographical Sketch <i>C. S. Aravinda and K. Srinivas</i>	1-6
My memories of Srinivasan <i>M. Ram Murty</i>	7-10
Remembering Srinivasan . . . <i>Colleagues and friends</i>	11-14
A Theorem of Fermat on Congruent Number Curve <i>L. Halbeisen and N. Hungerbühler</i>	15-21
On Pillai's problem with Pell numbers and powers of 2 <i>M. O. Hernane, F. Luca, S. E. Rihane and A. Togbé</i>	22-31
Fluctuation of the primitive of Hardy's function <i>M. Jutila</i>	32-39
On the Wintner-Ingham-Segal summability method <i>S. Kanemitsu, T. Kuzumaki and Y. Tanigawa</i>	40-47
On an identity of Ramanujan <i>Y. Motohashi</i>	48-49
On l-Regular Bipartitions Modulo m <i>D. D. Somashekara and K. N. Vidya</i>	50-57
When are Multiples of Polygonal Numbers again Polygonal Numbers? <i>J. S. Chahal, M. Griffin and N. Priddis</i>	58-67
An elementary property of correlations <i>G. Coppola</i>	68-76
The Zeta Mahler measure of $(z^n - 1)/(z - 1)$ <i>A. Biswas and M. Ram Murty</i>	77-84
On certain sums over ordinates of zeta-zeros II <i>A. Bondarenko, A. Ivić, E. Saksman and K. Seip</i>	85-97

Two applications of number theory to discrete tomography <i>R. Tijdeman</i>	98-103
Hybrid level aspect subconvexity for $GL(2) \times GL(1)$ Rankin-Selberg L-functions <i>K. Aggarwal, Y. Jo and K. Nowland</i>	104-117
Set Equidistribution of subsets of $(\mathbb{Z}/n\mathbb{Z})^*$ <i>J. Chattopadhyay, V. Kumar and R. Thangadurai</i>	118-126
A remark on cube-free numbers in Segal-Piatestki-Shapiro sequences <i>J-M. Deshouillers</i>	127-132
A note on some congruences involving arithmetic functions <i>J. Sándor</i>	133-139
Integral points on circles <i>A. Schinzel and M. Skalba</i>	140-142
Explicit abc-conjecture and its applications <i>K. C. Chim, S. Nair and T. N. Shorey</i>	143-156
The Barban-Vehov Theorem in Arithmetic Progressions <i>V. Kumar Murty</i>	157-171

Editorial Note

We are pleased to bring this special Volume 41 dedicated to the warm memory of S. Srinivasan, one of the early students of K. Ramachandra. Srinivasan would have turned 75 in 2018.

The warm and spontaneous response to the special volume effort has been overwhelming, and we record with deep gratitude the immense support received from all the contributors, and the knowledgeable referees who have made it possible for us to realise this humble tribute in fond memory of S. Srinivasan.

K. Srinivas of the Institute of Mathematical Sciences in Chennai, India, who served as the Guest Editor of this commemorative issue has been an integral part of this effort. Our grateful appreciation are due to him.

We are equally delighted to inform that one of the members of the HRJ Editorial Board, namely Ritabrata Munshi, is the recipient of the prestigious honour of the 2018 Ramanujan Prize from the ICTP <https://www.ictp.it/about-ictp/media-centre/news/2018/6/ramanujan-winner.aspx>

The Ramanujan Prize cites Munshi's profound contributions to the study of analytic properties of L-functions and automorphic forms: *The focus of his work is central to modern number theory, one that links arithmetic geometry, representation theory and complex analysis in many profound ways. Munshi has developed an ingenious method which produced a breakthrough in the field, going significantly beyond what was known before.*

In another direction, it is with immense pleasure that we inform further enhancement of the HRJ Editorial Board, starting from January 2019, with the inclusion of Aleksandar Ivić, Alberto Perelli, Kartik Prasanna, Arul Shankar and T. N. Shorey. In addition, K. Srinivas and R. Thangadurai will also be onboard HRJ as Managing Editors.

Paper submissions can be done using the Episciences online portal, and detailed instructions for authors are available at <https://hrj.episciences.org>.
