

OBITUARY NOTICE

1. PROFESSOR RAJA RAMANNA (28-01-1925 TO 24-09-2004)

This journal is dedicated to Analytic Number Theorists of the World. But the case of Raja Ramanna (who is not an Analytic Number Theorist) is so compelling that it deserves a place here. Professor Raja Ramanna was in the Council of Administration of T I F R (Bombay) and knew the contributions to Analytic Number Theory by K.Ramachandra. When Ramachandra retired from T I F R (Bombay) the very next day he was appointed as Honorary Visiting Professor at NIAS by Raja Ramanna (The Founder Director). Thanks to the encouragement of Raja Ramanna, Ramachandra could devote to research peacefully after retirement and four of his best (for life time) researches have been carried out during Raja Ramanna's presence at NIAS till his death. A paper on Atomic Physics deserves a place here. S.R. Jain, Raja Ramanna and K.Ramachandra, *Time Delay, Energy Continuum, and Systematics of Particles*. arXiv:quant-ph/0311063 v1 11 November, 2003.
